

## The Reform Candidate Party Response

Dear Julie, it is not party policy for me to make pledges on policy during campaigning. However I can say that I was a trustee for the Horsell Common Preservation Society for two decades and have been a member for much longer. The common is a SSSI and a very rare habitat. In fact, one of the rarest on the globe. I was deeply involved in the creation of the plans that have made this a success story.

I have entered politics because the greatest pressure on our environment has arisen from the huge demand for housing; and, of course, the related developments. Roads, schools, hospitals, warehouses, etc. Three million additional immigrants in three years; where are we going to house them? All of the three main parties, for various reasons, want to increase this. It seems putative job opportunities for those from overseas is more important than our environment. It seems to me that only Reform UK offers an alternative. If you agree please support ReformUK and ask your family, friends, and acquaintances to do likewise.

Yours very sincerely,

Charles Shackerley-Bennett
